1. Basis of preparation

The interim financial statements of the Bank have been prepared in accordance with the Nepal Financial Reporting Standards (NFRS) adopted by the Accounting Standard Board of Nepal.

2. Statement of Compliance

The interim financial statements of the Bank have been prepared in accordance with Nepal Financial Reporting Standards (NFRS) to the extent applicable and as issued by Accounting Standard Board- Nepal

3. Use of Estimates, assumptions and judgments

The preparation of the interim financial statements in accordance with NFRS requires management to make judgements, estimates and assumptions in applying the accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Due to the inherent uncertainty in making estimates, actual results reported in future periods may be based upon amounts which differ from those estimates. Estimates, judgements and assumptions are periodically evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to accounting estimates are recognized prospectively.

4. Changes in Accounting policies

The bank has adopted NFRS 09 for classification of financial instruments, earlier classified as per NAS 39, as issued by ASB Nepal, which resulted in changes in accounting policies and adjustments to the amounts previously recognized in the interim financial statements.

5. Significant Accounting Policies

a. Basis of Measurement

The interim financial statements have been prepared on historical cost basis except for following material items in the statement of financial position:

- Financial assets other than measured at amortized cost are measured at fair value
- > Non-derivative financial instruments at fair value through profit or loss are measured at fair value
- > Derivative financial instruments are measured at fair value, if any
- > Inventories are measured at cost or net realizable value whichever is lower
- ➤ Net defined benefit liabilities are measured at Present Value of Defined Benefits Obligation less the Total Plan Assets.

b. Basis of Consolidation

The bank does not have control over any other entity for consolidation of financial statements. Investments in associates are accounted for in financial statements as per equity method although associate's financial statements are not prepared using uniform accounting policies for like transactions and events in similar circumstances as it is impracticable to do so.

c. Cash and Cash Equivalent

Cash and cash equivalent comprise the total amount of cash-in -hand, balances with other bank and financial institutions, money at call and short notice, and highly liquid financial assets with original maturities period of three months or less from the acquisition date that are subject to an insignificant risk of changes in their fair value and are used by the bank in the management of its short-term commitments.

Cash and Cash equivalents are measured at amortized cost in the statement of financial position.

d. Financial assets and Financial liabilities

The bank classifies its financial assets into the following measurement categories:

- a) financial assets held at fair value through profit or loss;
- b) financial assets held at fair value through Other Comprehensive Income, and
- c) financial assets held at amortized cost.

Financial liabilities are classified as either

- a) held at fair value through profit or loss, or
- b) held at amortized cost.

e. Recognition

The Bank initially recognizes a financial asset or a financial liability in its statement of financial position when, and only when, it becomes party to the contractual provisions of an instrument. The Bank initially recognize loans and advances, deposits; and debt securities/ subordinated liabilities issued on the date that they are originated which is the date that the Bank becomes party to the contractual provisions of the instruments. Investments in equity instruments, bonds, debenture, Government securities, NRB bond or deposit auction, reverse repos, outright purchase are recognized on trade date at which the Bank commits to purchase/ acquire the financial assets. Regular purchase and sale of financial assets are recognized on trade date.

f. Measurement

Initial Measurement

At initial recognition, the bank measures a financial assets or financial liability at its fair value plus or minus, in the case of financial asset or financial liability not at fair value through profit or loss, transaction cost that are incremental and directly attributable to the acquisition or issue of the financial assets or financial liability, such as commission and fees. The transaction cost of financial assets and financial liabilities carried at fair value through profit of loss are expensed in profit or loss.

Subsequent Measurement

A financial asset or financial liability is subsequently measured either at fair value or at amortized cost based on the classification of the financial asset or liability.

g. Derecognition

Derecognition of Financial Assets

The Bank derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Bank neither transfers nor retains substantially all the risks and rewards of ownership and it does not retain control of the financial asset.

Derecognition of Financial Liabilities

A financial liability is derecognized when, and only when it is extinguished (i.e. when the obligation specified in contract is discharged, cancelled or expired). If the liability is renegotiated with the original lender on substantially different contractual terms, the original liability is derecognized and new liability is recognized.

Determination of Fair Value

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date.

h. Impairment

At each reporting date, the Bank assesses whether there is objective evidence that a financial asset or group of financial assets not carried at fair value through The Statement of Profit or Loss are impaired.

However, in case of loans and advances, impairment loss is measured as the higher of amount derived as per norms prescribed by Nepal Rastra Bank for loan loss provision and amount determined as per NAS 39 para 63.

i. Trading Assets

The Bank classifies financial assets or financial liabilities as held for trading when they have been purchased or issued primarily for short term profit making through trading activities or form part of a portfolio of financial instruments that are managed together for which there is evidence of a recent pattern of short-term profit taking. Held for trading assets and liabilities are recorded and measured in the statement of financial position at fair value. Changes in fair value are recognized in net trading income. Interest and dividend income or expense is recorded in net trading income according to the terms of the contract, or when the right to payment has been established. Included in this classification are debt securities, equities, short positions and customer loans that have been acquired principally for the purpose of selling or repurchasing in the near term.

j. Property, Plant and Equipment

All Property, plant and equipment is stated at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the assets. Subsequent costs are included in the asset's carrying amount or are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the bank and the cost of the item can be measured reliably.

k. Goodwill and Intangible assets

Intangible assets include externally generated capitalized software enhancements. Intangible assets, which have been determined to have a finite useful life, are amortized on a straight-line basis over their estimated useful life. Intangible assets with finite useful lives are reviewed at each reporting date to assess whether there is any indication that they are impaired. If any such indication exists the recoverable amount of the asset is determined and, in the event, that the asset's carrying amount is greater than its recoverable amount, it is written down immediately.

l. Investment Property and Noncurrent Assets held for sale Investment Property

Investment property is the land or building or both held either for rental income or for capital appreciation or for both, but not sold in ordinary course of business and owner-occupied property.

Non-Current Assets held for sale

Non-current assets (or disposal groups) are classified as assets held for sale and carried at lower of carrying amount and fair value less costs to sell if their carrying amount is recovered principally through a sale transaction rather than through continuing use. The assets are not depreciated or amortized while they are classified as held for sale. Any impairment loss on initial classification and subsequent measurement is recognized as an expense. Any subsequent increase in fair value less costs to sell (not exceeding the accumulated impairment loss that has been previously recognized) is recognized in the statement of Profit or Loss.

m. Income Tax

Current income tax which is payable on taxable profits is recognized as an expense in the period in which the profits arise.

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted at the reporting date in Nepal.

n. Deposit, Debt Securities issued and subordinated liabilities

The estimated fair value of deposits with no stated maturity period is the amount repayable on demand. The estimated fair value of fixed interest bearing deposits and other borrowings without quoted market prices is based on discounting cash flows using the prevailing market rates for debts with a similar credit risk and remaining maturity period.

Debentures are recognized at amortized cost using effective interest rates. The coupon rates of these instruments represent the effective interest rates.

o. Provisions

Provisions are recognized when the Bank has a present obligation (legal or constructive) as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the effect of the time value of money is material, the Bank determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. The expense relating to any provision is presented in Statement of Profit or Loss net of any reimbursement in other operating expenses

p. Revenue Recognition

Revenue is recognized only when it is probable that the economic benefits associated with the transaction will flow to the entity. In some cases, this may not be probable until the consideration is received or until an uncertainty is removed.

(i) Interest income

Interest income is recognized in the profit or loss as per accrual basis of accounting and as per NRB Circular No. 1 of F/Y 2076-77- Interest Income Recognition.

(ii) Fees and Commission

Fees and commission income including management fee, service charges, and syndication fee and forex transaction commission are recognized as the related services are performed.

(iii) Dividend Income

Dividend on investment in resident company is recognized when the right to receive payment is established. Dividend income are presented in net trading income, net income from other financial instruments at fair value through profit or loss or other revenue based on the underlying classification of the equity instruments.

(iv) Net trading income

Gain and losses arising in changes in fair value of financial instrument held at fair value through profit or loss are included in Statement of Profit or Loss in the period in which they arise.

(v) Interest Expenses

Interest expense on all financial liabilities including deposits are recognized in profit or loss using effective interest rate method. Interest expense on all trading liabilities are considered to be incidental to the Bank's trading operations and are presented together with all other changes in fair value of trading assets and liabilities in net trading income.

(vi) Employees Benefits

Short-term employee benefits, such as salaries, paid absences, performance-based cash awards and social security costs are recognized over the period in which the employees provide the related services.

(vii) Foreign Currency Translation

The interim financial statements are presented in Nepalese Rupees, which is the Company's functional and presentation currency.

q. Share Capital and Reserve

The Bank applies NAS 32, Financial Instruments: Presentation, to determine whether funding is either a financial liability (debt) or equity. Issued financial instruments or their components are classified as liabilities if the contractual arrangement results in the bank having a present obligation to either deliver cash or another financial asset, or a variable number of equity shares, to the holder of the instrument.
